

PV624

Portable hybrid pressure controller

Druck
a Baker Hughes business

Combining **manual** pressure generation, with **automatic** control technology

Fast and efficient pressure generation with **exceptional** stability at high pressure

Part of the GENii Advanced Modular Calibration System

**Pioneering Druck technology,
back to its best.**

find out more at Druck.com/PV624

The PV624 is a portable hybrid pressure controller base station that combines the advantages of manual pressure generation and fully automatic pressure control.

Using the PV624 with a DPI620G electrical calibrator and interchangeable PM620/PM620T pressure modules creates a uniquely capable, flexible, self-contained portable pressure calibrator.

The PV624 hybrid pressure controller offers an easy and fast method to accurately maintain pressure set points. Hybrid pressure control also supports large test volumes and long battery life.
